Weekly Market Review

Indices end lower as rollout weights; Nifty ends below 24600 level

Indian equity markets ended the week with moderate losses as investor sentiment remained subdued amid the rollout of the Securities and Exchange Board of India (SEBI)'s new Closing Auction Session (CAS) mechanism, which triggered sharp price movements in several heavyweight stocks during the closing minutes of trade. The heightened volatility also affected the settlement of weekly derivatives contracts on both the NSE and BSE, adding to investor caution.

Investor caution was further reinforced after the Reserve Bank of India (RBI) kept the benchmark repo rate unchanged at 5.25% while retaining its neutral monetary policy stance.

Although the RBI expressed confidence in the domestic economy by raising its FY27 GDP growth forecast to 6.7% and lowering its inflation projection to 5.0%, the positive macroeconomic outlook failed to lift market sentiment. Instead, investors remained focused on near-term risks, including heightened market volatility, geopolitical developments, and uncertainty surrounding the impact of the new CAS framework on trading dynamics.

In the week ended on Friday, 7 August 2026, the S&P BSE Sensex shed 139.86 points or 0.18% to settle at 78,499.17. The Nifty 50 index declined 203.65 points or 0.82% to settle at 24,570.65.
